PROFESSIONAL SUMMARY

Backend engineer with 6+ years of experience building and maintaining web and e-commerce systems, with deep expertise in PHP/Symfony, Magento 2 (Adobe Commerce) and growing focus on Go microservices. Specialized in payment integrations, multi-tenant platforms, high-load data processing, and cross-platform e-commerce plugin development. Delivered production plugins for 5 major e-commerce platforms, integrated multiple payment providers, and built Go services processing analytics data into ClickHouse.

TECHNICAL SKILLS

Languages: PHP 7/8, Go (Golang), JavaScript, TypeScript, HTML, CSS, SQL

E-commerce & CMS Platforms: Magento 2 / Adobe Commerce (incl. Hyvä theme), Shopware 6, WooCommerce, PrestaShop, OpenCart, Sulu CMS 3

Frameworks & Libraries: Symfony 6/7, Doctrine ORM, Twig, Symfony UX (Stimulus, Turbo, Live Components), FrankenPHP, Gin (Go), React, Vue.js, Node.js, Bootstrap 5, jQuery, Knockout.js

APIs & Communication: GraphQL, REST API, RabbitMQ, Webhooks, gRPC basics

Databases & Storage: MySQL, Redis, ClickHouse

Cloud & Infrastructure: GCP (Cloud Run, Pub/Sub, Compute Engine, Maps, reCAPTCHA), Docker, docker-compose, Nginx, Linux

CI/CD & Monitoring: GitLab CI, GitHub Actions, Grafana, Prometheus

Testing: PHPUnit, integration tests, Playwright, end-to-end testing; Go testing package, testify, table-driven tests

Practices & Architecture: SOLID, DRY, KISS, Design Patterns, DDD (layered: Domain / Application / Infrastructure), TDD, code review, performance profiling (Xdebug, PHPStan, PHP-CS-Fixer)

WORK EXPERIENCE

Full-Stack PHP Developer — Magedia

January 2026 — Present

Multi-tenant web portal for childcare facilities (Betreuungsstätten) — a public-facing site for parents and an admin interface for content editors, built on Sulu CMS.

- Working full-stack on PHP 8.4, Symfony 7, Sulu CMS 3, Doctrine ORM, RabbitMQ, and FrankenPHP.
- Building Sulu Admin (React-based custom widgets, admin form types, XML templates) and the public site (Twig, Symfony UX — Stimulus, Turbo, Live Components — Bootstrap 5.3, SCSS, AssetMapper).
- Following a DDD layered architecture (Domain / Application / Infrastructure / UserInterface); maintaining quality with PHPStan, PHP-CS-Fixer, PHPUnit (unit + integration) and Playwright (E2E).
- Managing infrastructure (Docker Compose, GitLab CI/CD, review apps), handling code reviews, merge conflict resolution, and pipeline verification across parallel feature branches.

PHP Developer — Noda (EU/UK Payment Provider), Remote

April 2024 — January 2026

Noda is a licensed payment provider operating across the EU and UK. I work on the plugin ecosystem and supporting Go-based backend services.

- Built and shipped official Noda Payment plugins for 5 e-commerce platforms: Magento 2, Shopware 6, WooCommerce, PrestaShop, and OpenCart — including a shared custom SDK to unify the integration layer.
- Integrated Noda Payment and Stripe into a React-based checkout application.
- Integrated Noda Payment into the WooCommerce Gutenberg checkout block (Blocks API).
- Integrated ShipBob fulfillment and QuickBooks Online accounting with Magento 2.
- Developed Go microservices communicating via RabbitMQ:
 - analytics service — scrapers and ingestion pipelines writing processed data into ClickHouse for reporting;
 - email notifications service — consumes a dedicated email queue, renders the appropriate template and dispatches transactional emails;
 - webhook delivery service — receives payment status updates from the core platform and pushes order status changes to merchant stores.
- Wrote technical documentation and managed plugin releases across Magento Marketplace, Shopware Store, WordPress.org, PrestaShop Addons, and OpenCart Marketplace.

Magento 2 Developer — *Aurora Creation, Poland*

July 2023 — April 2024

- Developed custom Magento 2 extensions and ensured compatibility with third-party modules from other vendors.
- Integrated payment, shipping, and other third-party services via REST APIs.
- Built and maintained Symfony-based microservices communicating through RabbitMQ; containerized services with Docker.
- Profiled and optimized Magento 2 store performance and SQL queries; debugged complex issues with Xdebug.
- Covered features with unit, integration, and end-to-end tests.

Magento 2 Developer — *Onilab LLC, Remote*

April 2022 — July 2023

- Worked on a large B2B Magento 2 project with a React-based frontend.
- Developed backend GraphQL endpoints for the custom checkout, including payment integrations and cart/checkout compatibility.
- Collaborated closely with the frontend team to align API contracts and resolve checkout edge cases.

Magento 2 Developer — *Amasty, Minsk, Belarus*

August 2019 — April 2022

Amasty is one of the largest Magento extension vendors. I supported and developed core commercial products used by thousands of merchants.

- Contributed to and supported high-profile Amasty extensions, including: One-Step Checkout, Reward Points, Gift Card, Stripe Integration, and Order/Customer Grid.
- Resolved technical issues in customers' codebases via the support ticket system; delivered tailored solutions and bug fixes.
- Refactored legacy extension code, profiled performance bottlenecks, and optimized SQL queries.
- Built new custom extensions and integrations on top of existing Amasty products.

LANGUAGES

English — B2 (working proficiency)

Polish — A2 (basic, improving)

Russian — Native

EDUCATION

Computer Systems and Networks — University coursework (2019 — 2022)

Electronics Technician — College Diploma (2013 — 2017)
